Three Bridges Oak Preserve Fuels Reduction Project

The Upper Salinas-Las Tablas Resource Conservation District (USLTRCD) is partnering with the Atascadero Land Preservation Society, the Atascadero Fire Department, San Luis Obispo County Firesafe Council and CALFIRE to implement a fuels reduction project at Three Bridges Oak Preserve. More information on this collaborative project is listed below.

- Project's goals include enhancement of forest health and mitigation of wildfire risks to the community
- Treatments will focus on reducing dead vegetation and some live vegetation that serves as wildfire fuel both in the preserve and along roadways
- Treatment units are strategically located near homes and in high fire hazard severity zones
- Fuels reduction crews will use chainsaws and tracked chippers to disperse material. The work will be noisy; however noise ordinances will be adhered to
- The work will begin no sooner than April 14th. Crews are expected to take 7-9 days to complete the project
- To ensure the protection of wildlife, certified biologists will be present on-site periodically throughout the project's duration
- Funding for this project provided by the California Department of Forestry and Fire Protection's Wildfire Resiliency Program

If you have any questions or concerns, please call Spencer Gordon, USLTRCD Forestry Project Manager (805) 460-7272 or Dave Van Son, Battalion Chief at (805) 470-3326
